ABOUT US

BORİSTRAK was founded on the industry experience of Fatih Hırdavat, which began operating in agricultural and tractor spare parts in 2019. Turning needs in the field and gaps in supply processes into investment in production, the company entered the manufacture of hydraulic top links, hydraulic cylinders and lift cylinders.

Based in Konya, our company manufactures solutions for the agricultural and machinery industries, including hydraulic top links, custom machine cylinders, seed drill cylinders and fertiliser spreader cylinders. We expand our product range to meet customer expectations, focusing on quality, efficiency and a balanced price.

With a commitment to continuous improvement, we refine our production processes and aim to provide reliable service from pre-sales to after-sales. Through strong cooperation with our customers, employees and suppliers, we seek to contribute to the regional and national economy.

At BORİSTRAK,
we work to be the reliable manufacturing strength
behind every movement.
